

To Whom it may concern; Due to my job requirements of traveling all over the United States, I have chosen to subscribe to XM radio to provide a constant connection to the programming I know and love. Prior to having XM I would rarely listen to any radio due to the inadequate content and programming. As far as the news and weather, this feature provides important information about my home city while I am in other places than in lovely Houston, TX. This information is very useful when making travel plans and checking local weather which may affect my family. Any legislation against XM programming is totally uncalled for and should not be levied.

Thank you,
Mark Kuhn
